Press Release

New 2U half rack mount shelf option for Associated Research's Hypot® III and HYAMP® III Models

The rack mount kit allows an easy and cost effective solution for manufacturers who want to mount their instruments in a side-by-side rack

Lake Forest, Illinois, September 2002 - Announced today by Associated Research, Inc., a leader in electrical safety compliance testing, is the addition of a 2U half-rack mounting kit, part number 38321 to be used with it's Hypot III line of Dielectric Withstand testers models, 3605, 3665, and 3670 as well as the HYAMP III Ground Bond tester model 3130. These models can be interconnected to be used in tandem as a complete electrical safety compliance testing system. The rack mount kit will save space in a manufacturer's workstation by enabling both instruments to be conveniently mounted side by side in a 19" rack. With a price of only \$85 the rack mount kit is a simple and cost effective solution for manufacturers who want to mount their instrument in a 2U cabinet. It also provides the necessary flanges for easy mounting and handles for easy removal. The rack mount kit is the perfect companion accessory to the Associated Research's system 3100.

The system 3100 consists of one of the Hypot III models and the HYAMP III, model 3130. The system provides manufacturers with the capability to perform Dielectric Withstand, Insulation Resistance and Ground Bond tests with one Device Under Test (DUT) connection. It also allows all tests to be performed with a single test switch activation. This increases the manufacturer's throughput as well as the reliability and safety of the test. The system 3100 contains advanced features such as an enhanced graphic LCD, which provides an easy-to-interpret user interface, VERI-CHEK™, which is a built-in self verification system and CAL-ALERT™, which is a built-in calibration alert system.

Founded in 1936, Associated Research, Inc., is a worldwide leader in Electrical Safety Compliance Testing Instruments. Contact the company at 1-800-858-TEST (8378), e-mail at info@asresearch.com or visit our site on the World Wide Web at <http://www.asresearch.com>
