# Press Release

## Associated Research's HYAMP® III line of mid-range ground bond testers has received UL listing

### HYAMP III now carries the combined Canada/US UL listing mark.

Lake Forest, Illinois, October 2003 - Announced today by Associated Research, Inc is the C-UL US listing mark on their HYAMP III line of mid-range ground bond testers. Underwriter's Laboratories an independent, not for profit product safety testing and certification organization is one of the most recognized safety agencies in the world. The UL listing number that HYAMP III has received is E204261; this means that the HYAMP III family has been tested to and passed all of the specifications called out in UL 3111. The Canada/U.S listing mark that HYAMP III has received means that the safety mark complies with regulations for both countries.

UL listing provides assurance to manufacturers that the fundamental design of HYAMP III is safe for normal operator use. UL is also a Nationally Recognized Testing Laboratory (NRTL) therefore the UL listed HYAMP III also provides compliancy to the Occupational Safety and Health Administration (OSHA) of the U.S. Department of Labor Standards.

HYAMP III features two models. The 3130 is a 30 Amp Ground Bond tester and the 3160 is a 60 Amp Ground Bond tester. Both models feature an enhanced graphic LCD and simplified user-interface. Both models can be used stand alone or interconnected to Associated Research's Hypot III family of mid-range Hipot testers to form a complete test system. These instruments provide advanced features and technology for a mid-range Ground Bond tester.

#### Features include:
